

GSW226

Steer axle application winter tire, suitable for snowy, icy and wet winter condition.

Steer

Overview

Rim Sizes:22.5

Aspect Ratio:55-80mm

Section Width:295-385

Speed Rating:K-M

Features	Benefits
Wider tread and deeper tread pattern	For high mileage
Five zigzag grooves and Z grooves cross each other design	Quickly exclude snow or water between the tire and road surface, to provide a stable grip
With "Z" blades and shallow transverse groove on the center blocks	For better steering and lateral force
Semi-open shoulder with transverse blades and intensive slices along the edge of shoulder groove	Improved wet braking and grip on snow
Optimized design of variable pitch	Effectively reduce the noise and improve comfort

GT RADIAL - GSW226 offers 0 different tyre sizes
